SUNRAIN

Rain-protection for your revenue

Outdoor is the new indoor.

The outdoor gastronomy sector is undergoing a massive boom. People are increasingly keen to enjoy the fresh air. Outdoor terraces are now big business all year round.

And what happens if the weather is bad?

The beer gardens and pavement cafés are deserted if it starts raining or if the weather is unsettled. Customers flee, looking for a dry place to shelter or going home.

With SUNRAIN products, outdoor catering venues need not be so dependent on the weather.

Textile and flexible systems for your outdoor space.

- Protection from the sun and rain
- Rainproof – highest performance class under EN 13561
- Wind-resistant – greater wind resistance thanks to the Wind Protect System (WPS)
- Advertising space
- Short payback periods
- Customized products
- Fixed installation or mobile solutions

Your guests simply stay where they are if it starts raining.

SUNRAIN

For sun and rain

Maximise the time spent outdoors and benefit the potential for year-round revenue

SUNRAIN - the awning for sun and rain: conventional awning systems reach their limits when it rains. The SUNRAIN combines all the advantages of a folding arm awning with LEINER's patented SUNRAIN technology, making it the perfect solution for sun and rain because it provides shade and can remain extended when it is raining. From an inclination of 5°, the rain runs off in a controlled manner. Pockets of water do not form.

GASTRO SUNRAIN

Free-standing awning

GASTRO SUNRAIN – free-standing protection from the sun and rain:

The GASTRO SUNRAIN can provide coverage for areas up to 135 m². The aluminium frame is particularly sturdy and elegant. This unique system will protect your guests in almost all weathers. The space under the awning can be used optimally. The GASTRO SUNRAIN can simply be stabilized with concrete weights or it can be fixed to a foundation.

PERGOLA SUNRAIN

Terrace folding roof

PERGOLA SUNRAIN – the terrace folding roof:

Combining exceptional flexibility with wind resistance, it is ideal for use in the hotel and restaurant sector. This terrace folding roof can withstand wind speeds of up to 9 Beaufort and is the perfect shelter from sun, rain and wind. The pergola's flexible textile space systems can easily be adapted to the weather conditions. When fitted with LED lighting, they ensure a great atmosphere.

Q.BUS | Q.BUS SZ

Free-standing awning

Q.bus - the incredibly flexible

shade: Q.bus is a new and innovative shade system boasting a supremely sophisticated design. It is free-standing and functional, providing optimum shading and boasting unashamedly good looks. Multiple systems can be combined to shade large areas. The SZ variant allows the system to be used in locations exposed to the wind as well.
